

CLOUD DEPLOYMENT PROS + CONS

PROS

Less maintenance / logistics

Less upfront cost

MUCH faster deployment

ELASTICITY

↳ scaling to meet demand

↳ on-demand resources

↳ can be automated

↳ resources that go down

can be automatically
restarted

↳ Economy of
Scale

CONS

More secure sometimes to keep
data in-house

Possibly more expensive in the long
run

AVAILABILITY - distance between
users + data is shortened

→ MASSIVE REDUNDANCY
